Keynote Speakers

We welcome you to participate in the first International conference on Smart Computing and Electronic Enterprise (ICSCEE2018). Smart computing is multi-disciplinary area where advanced computational methods and technologies to create systems, applications and new services that meet the needs of society. With electronic enterprise, road maps to a well-planned evolution of enterprise complexity with business and system strategies are integration through standardized and synchronized architectures of IT components.

Conference Tracks

Smart Computing
- Future Smart Computing Paradigms and Models
- Algorithms of Smart Environments
- Cloud and Grid Computing
- Smart Networking Models
- Smart Device Hardware
- Cyber Hacking
- Digital Forensics

Big Data
- Techniques, Models, Algorithms, and Applications for Big Data
- Databases and Information Systems Integration
- Big Data Visualization
- Big Data Analysis

Information Retrieval
- Web Search
- Information Retrieval
- Knowledge Discovery
- Natural language processing

Network and Data Communications
- Mobile, Embedded and Wireless Networks
- Sensor Network Application and Security
- GIS Applications
- Optical Communications
- Signal, Image and Video Processing

Electronic Enterprise
- Electronic Information Systems
- Electronic Enterprise Models and Applications
- Enterprise Knowledge Engineering and Management
- Enterprise Architecture

Information Systems
- Smart Human-Computer Interaction
- Software Agents and Internet Computing
- Knowledge Management
- Software engineering

Artificial Intelligence
- Decision Support Systems
- Artificial Intelligence Techniques, Models, Algorithms, and Applications
- Social Engineering
- Cyber Threat Intelligence
- Intelligent Heterogeneous Architecture

All papers will be peer-reviewed and accepted papers of ICSCEE2018 will be submitted to IEEE Xplore. The conference will only accept paper(s) that adhered to IEEE format.

ICSCEE2018 is abstracted / indexed by Scopus, Google Scholar, ieeexplore, and EBSCO.
